PROJECTS

Modified Tiffin Service (DE Project)
- We developed a website that offers tiffin delivery services to students and employees . This aids women in their efforts to supplement their incomes through part-time employment .
- We have use HTML ,CSS , JavaScript , Tailwind , PHP , MySQL database .

Online Job Portal (College Project)
- We built a website that functions similarly to OJAS.
- As a frontend framework, we used HTML, CSS, JavaScript, Bootstrap, and the pug template engine.
- For the backend, we used NodeJS, Express JS, and MongoDB.

News - Template
- In this , news template website user can read the news .
- This contains three tier architecture : viewer , publisher and super admin .
- I used HTML , CSS , JS , Bootstrap as frontend and PHP as backend we use MySQL database
